Direct LED Technology, DTT HD, Digital Recorder

Direct LED Backlighting · DVB T · HDTV · DVR Digital Video Recorder · H.264 MKV/MPEG-4 · HDMI · USB MULTIMEDIA · 3D Comb Filter

NLD-3236HHB

DIRECT LED TECHNOLOGY

Direct LED technology provides a better quality and a lower energy consumption.

FULL BACKLIGHTING
The direct Led Technology provides a high proportion between contrast and clearer images, thanks to the uniform distribution of LEd diodes which are situated just behind the panel, unlike the EDGE LEd technology where the screen is light up from the borders only.

ecofriendly
Compared with CCFL backlight TV (LCD TV), Direct LED reduce more than 30% of the rated power, save 65KW/H average per year, and its screen cycle life reaches 60K hours.

SPECIFICATIONS

- D-LED TV 32"
- HD TV
- DVB-T SD (MPEG-2), HD (H.264) and analogue
- Resolution 1366 x 768
- 16.7 millions of colors
- 3D Digital Combo Filter
- DVR (Digital Video Recorder) by USB
